

RICKY RAMPERSAD BRANCH • GUARDIAN LIFE

Group Benefits Portal Training Manual

How the Group Fact Find works, what happens after every submission, and your part in turning requests into closed group business.

employeebenefitstt.com

FOR BRANCH STAFF & AGENTS • AUGUST 2026 • V1.0

1 What this is

The portal is the branch's **public front door for group business**. An employer — from Facebook, WhatsApp, or your referral — opens **employeebenefitsstt.com**, answers a guided **Group Fact Find**, uploads their staff list, and submits. No password, no paperwork, works on any phone.

The moment they press Submit, three things happen automatically:

1. The request is **logged on the branch Google Sheet** (the *Requests* tab) with a reference number.
2. The client receives a **branded thank-you email** with that reference.
3. The branch receives an **alert email** — with the **Guardian Census Data Form already filled in** and attached as Excel.

One rule to remember: the branch sheet's **Status column runs everything**. A request marked **New** gets chased automatically. The moment you change Status to anything else — **In review**, **Quoted**, **Won** — the chasing stops. Update it the moment you pick a request up.

2 The client's journey (what they experience)

STEP	WHAT THE CLIENT SEES
1 • About your company	Company name, contact person, email, phone, industry.
2 • Your workforce	Headcount and salaries — or simply upload the staff list (Excel or CSV) and the numbers fill themselves.
3 • What's in place	Existing cover: health, life, pension, income protection, critical illness.
4 • Pension structure	Plain-language questions (including the forfeiture question) that steer group trust vs individually-owned Section 134.
5 • Recommendation	An honest needs analysis: what's essential, recommended, or already covered — and why.
6 • Review & submit	Everything on one page including the filled Guardian census form , viewable before Submit. Then the confirmation with their reference.

Afterwards the client can return any time to track progress, review each benefit's quotation when you upload it, ask questions line-by-line, and approve.

3 Signing in (staff & agents)

- 1 Open **employeebenefitsstt.com** and choose the **Agent / Manager** tab on the sign-in screen.
- 2 Enter your **agent number** (e.g. **A10428** — the “A” adds itself if you type just digits).
- 3 Enter your password **from the branch roster sheet** (ask Ricky if you don't have it). You'll land on your pipeline.

Managers (Branch, Assistant, Unit) additionally see the whole branch pipeline, ageing, and chaser history. **Agents** see unclaimed requests and their own book.

4 Entering a request for a client

Sitting with an employer? Enter it yourself: sign in → **New request** → complete the Fact Find with them. The system emails *them* the confirmation and tracking invitation — it reads exactly as if they submitted it, and you're recorded as the introducing agent.

Tip: the fastest close is doing this live in the meeting — the census upload turns "send me your staff list" into a two-minute step, and they see the Guardian form filled before their eyes.

5 The census upload (the magic step)

- Accepts **Excel (.xlsx)** and CSV. The employer exports from payroll/HR — any column order works; headings are matched intelligently.
- The official **Guardian Census Data Form** itself also uploads correctly (title rows and all).
- Dates convert automatically; a “Monthly Salary” column is honoured, anything else is treated as annual and divided by 12.
- Old **.xls** files: ask the client to Save As → .xlsx or CSV — the portal explains this too.
- Before Submit, step 6 shows the **filled Guardian form**; it can also be downloaded as Excel there.

Minimum group size: Guardian requires **10 lives** for group health and life. Below that, pivot the conversation to individually-owned solutions.

6 After submission — the branch sheet

Every request appends a row to the **Requests** tab of the branch Google Sheet. The columns you work with:

COLUMN	HOW TO USE IT
Status	The control switch. New = chasers run. Change it when you pick the request up: In review → Quoted → Presented → Won / Lost .
Chasers sent / Last chased	Filled automatically by the 3 p.m. sweep — don't edit.
Via	client (came in from the public site) or agent (entered on behalf).
Notes	The client's free-text notes; add your own after a dash.

7 The automatic emails & 3 p.m. chasers

EMAIL	WHEN
Client thank-you (with reference)	Instantly on submission
Branch alert + Guardian census attached	Instantly on submission
Follow-up reminder	After 5 Trinidad working days with Status still New , then every working day at 3:00 p.m.
Escalation to Branch Manager	After 7 chasers with no status change

Weekends and all Trinidad & Tobago public holidays are excluded from the count.

8 Quotes, questions & approvals

When quotations come back from Guardian, upload each benefit's quote against the request. The client reviews **benefit by benefit**, asks questions in-line (you're notified and answer in the same thread), and approves each line. That approval trail is your mandate to proceed — and your close.

9 RAI — the built-in assistant

RAI (Ricky's Artificial Intelligence) sits on every page and answers benefit questions for clients and staff — plan types, the trust vs Section 134 trade-offs, process questions, what documents are needed.

RAI's hard rules (by design): it never quotes premiums or prices, never gives financial / legal / tax advice, and never collects personal data. Anything in that territory it hands to a human — you.

10 Rules of the road

- **Confidentiality:** never enter one client's data while demonstrating to another. Use the built-in sample instead (“View a sample form” on the sign-in screen).
- **The census contains personal data** — dates of birth and salaries. Don't forward it beyond Guardian channels, and delete stray copies from your phone.
- **Verify before it goes to Guardian:** the census attachment on the branch alert is what will be emailed to EB Customer Care — open it, sanity-check names/counts, then send.
- **Premiums come from Guardian quotations only.** Never estimate a price in writing — not in WhatsApp, not in email.
- **Speed wins:** the 5-day chaser is a safety net, not a target. Same-day contact doubles close rates.

11 Quick answers

QUESTION	ANSWER
Client didn't get the email?	Have them check Spam/Promotions and mark “Not spam”. Confirm the address on the sheet row.
Client has no staff list handy?	Headcount + average salary is enough to submit; census can follow.
Under 10 employees?	Group minimums not met — pivot to individually-owned cover (LifeSecure conversation).
Excel file won't upload?	Old .xls format — Save As .xlsx or CSV, or copy-paste the rows into the paste box.
Who do I call?	Ricky Rampersad, Branch Manager — 868-678-5821 .

The pitch in one line: “Answer a few questions on our portal, upload your staff list, and Guardian's official paperwork fills itself — you'll have your reference number before we hang up.”
